

New version SONOSAX SX-M2D2 from serial number 00300

1.1 Mic Power Management

The new version of the SX-M2D2 allows the use of Electret microphones.

This procedure was intentionally made difficult to protect your microphone.

To switch between 48v and Electret, follow the steps below :

1. Open the battery compartement so the device isn't powered.
2. Turn on the SX-M2D2 in Service mode by pressing down the 2 coders simultaneously while closing the battery compartement, the screen below should appear.

3. Select « MIC POWER », the following menu should appear.

4. Choose the desired setting, select « BACK » and then « EXIT » to close the Service menu and turn off the device.

1.2 Examples of connector Pin Assignments

DPA adapters DAD6017 and DAD3052 aren't compatible
